PCT International, Inc. Opens New Corporate Headquarters in Tempe, Arizona

GILBERT, AZ, July 24, 2006 — PCT International Inc. (PCT), a leading manufacturer of RF drop and optical networking products, today announced the addition of new corporate headquarters in Tempe, Arizona located in the Broadway 101 Center. The move accommodates corporate offices needed for planning and future growth of business operations and is a reflection of PCT's momentum and energy. Additionally, PCT has moved its prototyping, testing and characterization facility, from Fountain Hills, Arizona into its main facility in Gilbert, Arizona.

"Due to PCT's growth, our corporate team is assembled in one location minutes away from our testing and logistics facility for instrumental building of the company's brands and marketing development during this very important stage of our growth," said Steven Youtsey, Corporate Executive Officer of PCT. "This move allows us to expand our office space without sacrificing business operations and also fosters collaboration and creativity."

PCT's business is growing at a vigorous pace, spurred by the recent launches of new products, such as the Genesys 2M mini digital splitter, the AVR automatic voice router, the bypass drop amplifier, and the dynamic success and growth of PCT's patented torque retaining "F" connectors. This, in combination with PCT's recent additions of an international trading division, strengthens PCT's position in the telecommunications industry as a worldwide leader.

PCT began operating out of its new headquarters in Gilbert, Arizona, in 1997. The company's new corporate address is located at 2141 East Broadway Road, Suite 111, Tempe, Arizona 85282. Telephone and fax numbers remain: tel +1.480.813.0925; fax +1.480.545.1080.

About PCT International, Inc.
