FOR IMMEDIATE RELEASE

PCT International Announces Global RoHS Compliance for Optical Networking Products

GILBERT, AZ – December 18, 2006 – PCT International, Inc. (PCT), a leading manufacturer of RF drop and optical networking products, announced today a list of optical networking products that now meet the regulations of the European Union Restriction of Hazardous Substances (RoHS) Directive. The RoHS Directive, enacted into law by the countries of the European Union in February 2003, restricts specific hazardous substances in an effort to address waste management problems linked to materials that are likely to pose risks to human health and the environment.

PCT has implemented a management system to ensure that customers could continue to purchase its same high-quality products while working to meet the standards. The law requires all new commercial, electrical and electronic equipment to be manufactured within defined maximum concentration levels of hazardous materials such as lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, and polybrominated diphenyl ethers.

"We have made very successful strides in implementing the RoHS compliance project across PCT's diverse product line. We are diligently working on assuring that all of our communications products meet the global standards of the RoHS Directive wherever applicable," said Jon Wang, Vice President, Engineering & Manufacturing.

For this eco-friendly project, and for easy identification, all of PCT's RoHS compliant products will be labeled clearly to indicate compliance. PCT networking products that are RoHS compliant are included in the list below by management type.

802.3AH	CII-Chassis, CIII-2512, PIII-2512
In-Band Proxy	CCT-Chassis-II, CCT-3312, PCT-3312, CCT-2312, PCT-2312
SNMP	SWH-2109, SWH-2109+
Non	CVT-Rack-16, CVT-100, CVT-3002

RoHS compliant product additions will be posted on PCT's website, www.pctinternational.com.

About PCT International, Inc.

PCT International, Inc. (PCT) is a leading worldwide manufacturer of high-performance optical and RF products for broadband communication networks. PCT focuses on innovative and cost effective solutions that allow service providers to improve system integrity and expansion of their service offerings. PCT's portfolio includes transmission and connectivity products for the broadband, CATV, satellite, structured wiring markets, and television reception products for both professional and consumer markets. PCT is headquartered in Gilbert, Arizona and has over 1,000 employees. PCT maintains multi-international locations to support worldwide manufacturing, logistics, and distribution of its products and services. For more information, please visit www.pctinternational.com.
