## FOR IMMEDIATE RELEASE

### PCT International Opens Manufacturing Facility in Michigan

---

GILBERT, AZ, USA – June 20, 2007 – After nearly a decade of manufacturing premium drop products in Asia, PCT International has recently added a state-of-the-art domestic manufacturing facility to its holdings. Built in the state of Michigan to take advantage of the abundance of highly skilled workers, manufacturing expertise, and centralized location, the nearly 50,000 square foot manufacturing facility is now producing drop connectors and made-to-order coaxial jumper cables. Tim Youtsey, PCT's VP - Connector Division, states "we believe we are forward thinking, not only in our product designs, but also in our approach to manufacturing those products. Technological improvements and more sophisticated automation equipment should allow more and more manufacturing to return state-side."

The decision to enter the jumper cable market was an easy one for the company, because of unique strategic advantages. With the recent acquisition of Andrew Corporations 75 ohm coaxial cable plant and product line, PCT now manufactures both connectors and cable and can combine those products into a premium jumper cable at prices below inferior products. Randy Blunt, Engineering Manager for PCT's Connector Division, states "Our goal is not to use our manufacturing advantages to build a standard jumper cable at a reduced cost, but to combine those manufacturing advantages with our patented lock-washer connectors and other innovative products and bring a jumper cable solution to the market that can reduce service calls."

#### About PCT International, Inc.

PCT International, Inc. and its holding company, Andes Industries, Inc., is a leading worldwide manufacturer of last-mile products for broadband communication networks. PCT focuses on innovative and cost-effective solutions that allow service providers to improve system integrity and expansion of their service offerings. PCT's portfolio includes transmission and connectivity products for the broadband, CATV, satellite and structured wiring markets. PCT is headquartered in Tempe, Arizona, and has over 1,500 employees. PCT maintains multi-international locations to support worldwide manufacturing, logistics, and distribution of its products and services.
