

LINE EXTENDER AMPLIFIERS

ADVANCED FEATURES

- *Forward passband 54 to 860 MHz, and optional 65 to 860 MHz*
- *Integrated reverse amp for 2-way applications of 5 to 42 MHz or 5 to 65 MHz*
- *RF test points for forward and reverse injection simplify reverse balancing*
- *1 GHz housing allows for easy upgrades*
- *Excellent forward and return path performance*
- *Excellent circuit protection allows for 10 Amp continuous and 15 Amp short term current draw*
- *60 and 90 VAC powering capability*
- *Configurable for gain and tilt using plug-in attenuators and equalizers*
- *High efficiency power supply allows for simplified maintenance*

PCT-LE1S-R

*Use where reliable two-way
CATV applications are demanded.*

Rugged aluminum housing strong enough for outdoor use.

Designed with heavily ribbed housing for heat dissipation.
