

CABLE PACKAGING

Convenient, Simple and Green

MOGO® PRO, MOGO®, Caddy, Reel-in-Box, T-Pack, Reel and more

Innovation for the Last Mile™

THE RIGHT PACKAGE SIMPLIFIES INSTALLATIONS AND PRESERVES RESOURCES

PCT's range of innovative packaging solutions for our drop cable product line focuses on convenience, ease of handling and the environment. From our new and green MOGO Reusable Cable Pak to the industry standard wooden flanges, PCT has packaging options designed with your needs in mind.

MOGO® PRO AND MOGO® Reusable Cable Paks

Substitute the box in our reel in box packaging design with reusable, durable and fabric cable paks, these two packaging options are virtually waste free. Utilizing the same cable hub and the included flange assembly, the installer simply removes the empty hub and inserts a new, full 500 ft. hub. MOGO PRO is designed as a highly rugged cable pak with added features for more versatility; MOGO is durable and lighter in weight. While their colors are neutral, their result is very green.

Caddy

Designed to be convenient and environmentally friendly, PCT's reusable cable caddy provides a waterproof and nearly waste free option. The 700 to 800 ft. standard coil refills are shipped with minimal stretch wrap around each coil. The installer simply drops the coil into the caddy and is ready to go.

Reel in Box

With the addition of a small plastic hub and flange, this new box design delivers the smooth payout of a reel, the flexibility of 500 or 1000 ft. lengths and the convenience of a recyclable box. Built with reinforced handles, this box is easy to carry and easy to stack.

T-Pack

Designed to be lightweight and convenient, PCT's T-Paks incorporate a 500 ft. spool of cable enclosed in a small recyclable box with reinforced top handles for ease of portability. Ideal for tight spaces and long hauls, the T-Pack provides yet another portable solution for cable installers.

Reel

Our traditional, industry standard 1000 ft. wooden reels have been a mainstay for years and continue to provide a durable and reliable option for cable packaging. Easy pull out and compatibility with a variety of racking options, cable reels offer a solid packaging option.

Box

An alternative to the heavier reels, our standard 1000 ft. box provides a weatherized packaging option with reinforced handles that is fully recyclable. The center fed cable dispenses smoothly from the side of the box without the need for racks, stands or brakes.
