

SATIN PHONE CORD

4-Conductor, 26 AWG

PCT-TCA-155, PCT-TCA-170

Innovation for the Last Mile®

High quality materials for crystal clear, digital quality

PCT® satin phone cord is constructed of high quality materials and is designed for applications in a home or business so you get the most out of your digital phone service. Connecting your phone and/or fax to your eMTA is easy and you get crystal clear reception and digital call quality.

Recommended use for the following applications:

- ✓ Connecting an eMTA (combination cable modem and telephone adapter) to
 - Home telephones
 - Wall outlets to back feed the signal to additional outlets

Specifications

Parameter	Unit	PCT-TCA-155	PCT-TCA-170
ELECTRIC SPECIFICATIONS			
Conductor Resistance	Ohm / Km @ 20 °C	< 148.94	
Insulation Resistance	Ohm / Km @ 20 °C	< 45.3 M	
Dielectric Strength	V / min	DC500	
PHYSICAL CHARACTERISTICS			
Conductor Size	AWG	26	
Construction	--	Solid Copper	
Length	ft (m)	7 (2.13)	25 (4.27)
Conductor Diameter (nom)	mm	0.405	
Insulation Diameter (nom)	mm	0.97	
Insulation Color	--	Red, Green	
Insulation Material	--	PE	
Jacket Material	--	UL Approved PVC (gray)	
Jacket Color	--	Gray	
Jacket Diameter (nom)	mm	2.5 x 5.0	
Connector	--	6P2C
