## FOR IMMEDIATE RELEASE

### PCT Upgrades to A-Cables for All Balkans Customers

---

**MESA, AZ – July 6, 2016** - PCT International, a leading manufacturer of broadband communications products supporting video, voice and high-speed data services, including coaxial cable and fiber optics, announced today that A-Series cable will now be fully available to all Balkans-region customers. Combined with [locking connectors](#), PCT's A-series cable will ensure a complete LTE interference-free drop system.

PCT is committed to providing every customer with the highest-quality products, and is pleased to now offer A-Series cable to its valued Balkans customers. The A-Series cable is PCT's premium level cable constructed with materials that meet SCTE standards, packaged on extra strength, anti-mold reels and accessed through easy-to-use, sustainable boxes and caddies. The A-Series cable offers performance that meets all SCTE requirements, with each reel going through rigorous quality inspections in PCT's manufacturing facilities.

"PCT is trusted around the world to develop and manufacture the best products for the best price," said Mehmet Bayrak, Sales Director EMEA. "We have been working hard to make our A-series available to this important region, and we know customers will be eager to avail themselves of these premium cables that ensure a secure and reliable LTE network." added Bayrak.

PCT works closely in partnership with its customers to support and grow their businesses. PCT has invested heavily in its own infrastructure around the world with strategically located, wholly-owned and operated manufacturing facilities that have cutting-edge technology, access to low-cost raw materials and that are vertically integrated. This infrastructure allows customers to incrementally invest in their networks with innovative, trouble-free product that significantly reduce onsite visits and services calls. Additionally, customers benefit from PCT's unmatched Vendor Managed Inventory (VMI) system, which allows for streamlined ordering and inventory tracking. VMI also helps customers reduce their own inventory volume but ensures timely delivery of all products directly from our factories.

### About PCT International

Founded in 1997, PCT International, Inc. is a leading worldwide developer and manufacturer of last mile and access network solutions for broadband communication networks. PCT focuses on innovative and cost-effective solutions that allow service providers to improve system integrity and expand service offerings. PCT's portfolio includes transmission, connectivity, metro Ethernet and fiber-to-the-home products for cable, telco and satellite service providers. PCT's collaborative approach to product development results in advances that simplify installation and maintenance; improve the integrity of HFC and fiber infrastructures; reduce truck rolls and other associated costs; and most importantly increase customer satisfaction and reduce churn. By working closely with customers' field engineering personnel, PCT produces equipment and components that straightforwardly address real needs and enable operators to Harden the Drop. PCT International is headquartered in Mesa, Arizona. Visit [www.pctinternational.com](http://www.pctinternational.com).
