

Fiber Optic SFP Transceivers

Extensive Solutions No Matter the Platform, Distance or Speed

Overview

PCT International is an industry leading supplier of fiber optic transceivers. Along with our optics, PCT has an extensive offering of cables from the standard patch cable to custom telecom cables.

With over 20 years in the networking market, PCT has capitalized in offering the highest quality transceivers with some of the most aggressive cost savings in the industry. PCT has the ability to offer up to 70% off manufacturer direct pricing with an extended warranty that exceeds the original manufacturer warranties. PCT offers such aggressive savings and greater warranties that PCT's customers are assured in extending their IT budget while maintaining the highest quality products.

PCT's SFP transceivers come in a variety of speeds, such as 1G, 10G, 40G and soon to be released 100G.
